

Proven leadership in cardiovascular and metabolic disease clinical trials

Integrarium's clinical trial experience and scientific expertise make us the CRO partner of choice for pharmaceutical companies sponsoring cardiovascular and metabolic disease clinical trials. Integrarium's trial experience spans major indications within the cardiovascular and metabolic areas.

- Acute Coronary Syndrome
- Angina
- Arrhythmia
- Atherosclerosis
- Cardiomyopathy
- Combination Products
- Diabetes
- Dyslipidemia
- Hypertension
- Metabolic Syndrome
- Obesity
- Stroke

Since Integrarium's founding by three prominent research physicians in 1998, our satisfied client list has included a diverse range of sponsors – from major pharmaceutical companies to development stage companies. These clients have entrusted Integrarium to manage their trials domestically and multinationally, and have consistently expressed their satisfaction through repeat business.

Integrarium provides our clients with a full line of clinical trial services. We offer the following services as either stand-alone products or as part of a full turnkey clinical trial solution:

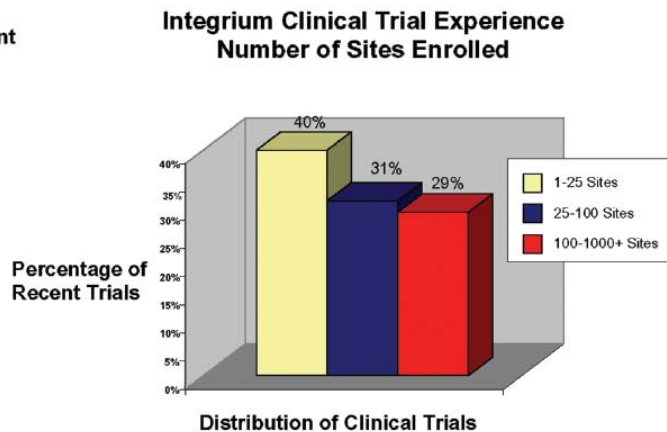

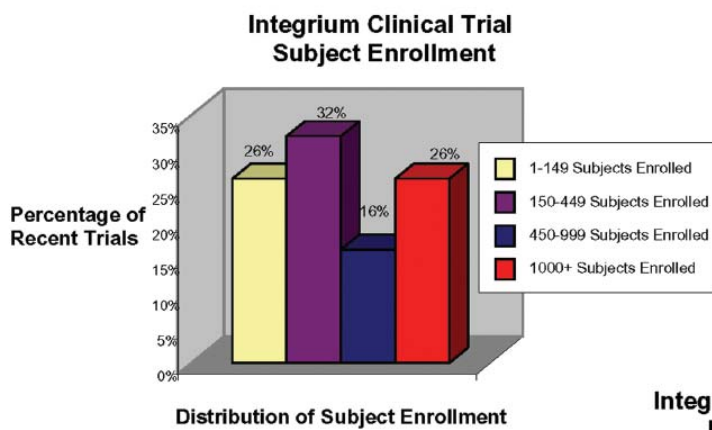

- Protocol Design and Development
- Study Start-Up Services
- Clinical Monitoring
- Project Management
- Medical Services/ Drug Safety
- Data Management
- Biostatistics and Statistical Programming
- Cardiovascular Core Laboratory Services
- Medical Writing

Integrarium is poised to create a lasting partnership with any company involved in the clinical development of cardiovascular and metabolic disease therapeutics.

Proven leadership in cardiovascular and metabolic disease clinical trials

Integrarium has successfully conducted clinical trials in all phases of clinical development – representing a broad spectrum of trial complexity and size. This in-depth experience ranges from small proof of concept studies to multinational Phase III studies to large-scale post-marketing studies.

Contact Integrarium's Business Development Department to learn more about how Integrarium can benefit your next cardiovascular and metabolic disease clinical trial.
