

Integrium Announces Organizational and Operational Enhancements

TUSTIN, CA, January 18, 2007 – Integrium, a leading contract research organization (CRO) in the cardiovascular and metabolic areas, today announced key organizational changes. These changes reflect the company's continued growth and commitment to delivering high-quality, efficient clinical trial services to its clients, as well as expanded operational capabilities.

Eileen McAuley has been promoted to Chief Operating Officer, from her previous position as Vice President of Clinical Operations. In this role, she is responsible for overseeing the day-to-day operations of Integrium and the work scopes executed for the company's clients. During her tenure with Integrium, Ms. McAuley has been pivotal in implementing continuous quality improvement initiatives and expanding the company's East Coast operations. She has worked for more than 18 years in the clinical research arena – including management positions with sponsors and CROs – and has a proven track record of managing large operations teams and delivering complex projects on time and within budget.

Adam Steadman takes on the role of Chief Strategy Officer, from his previous position as Chief Financial Officer. His primary responsibility is formulating and managing Integrium's plans for enhancing its clinical trial capabilities – including additional service offerings, expanded geographic coverage, infrastructure enhancements, and potential partnerships. This reflects Integrium's proactive approach to anticipate and respond to industry needs. Before joining Integrium, Mr. Steadman served as General Manager, CFO and CEO in several organizations.

Marjory Kadash has been appointed as Senior Director of Project Management. She is responsible for the further enhancement to the structure and processes under which client work scopes are conducted and will lead Integrium's experienced team of project managers in this effort. In addition, she will oversee the company's Regulatory Compliance group. Ms. Kadash was previously a consultant to Integrium and has 17 years of project leadership experience in the clinical research industry. She holds a Bachelor of Science Degree in Chemistry and a Masters in Textile Science.

Eileen Kelly has been promoted to Director of Data Management, from her previous position as Assistant Director with the company. In this pivotal role, she will oversee all data management activities for client work scopes and work closely on infrastructure enhancements in support of this key service line. Ms. Kelly has significant data management and EDC experience in the clinical research industry - including a position as the global head of Electronic Data Management for cardiovascular research for a major pharmaceutical company.

Ewa Olesiak-Deptuch has been appointed as Senior Director of Finance, having previously provided consulting services to Integrium. Ms. Olesiak-Deptuch has in-depth experience and a strong track record handling all financial aspects of contract research organizations including the tracking, reporting and reconciliation of client projects.

Integrium is a premier full-service contract research organization (CRO) for clinical trials in the cardiovascular and metabolic areas. The company provides biopharmaceutical and device clients with strong operational capabilities and in-depth clinical expertise in support of cardiovascular and metabolic development programs. Integrium was founded by three physician researchers in 1998 and supports trials on a domestic and multinational basis. Please visit www.integrium.com for more information.
